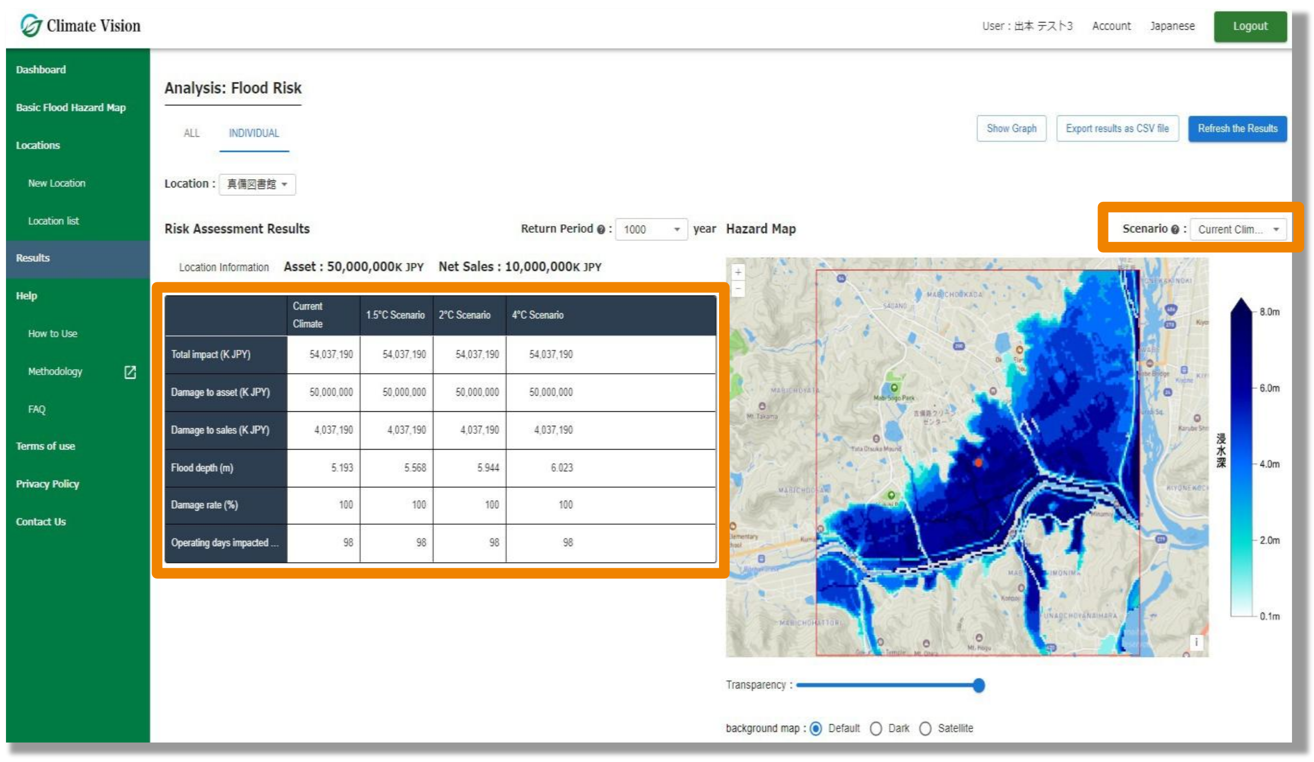
Gaia Vision

SAKIGAKE
(Authorized Distributer)

Flood & Climate Risk Analysis Platform for Climate Change Adaptation

Climate Risk Analysis

Climate Vision

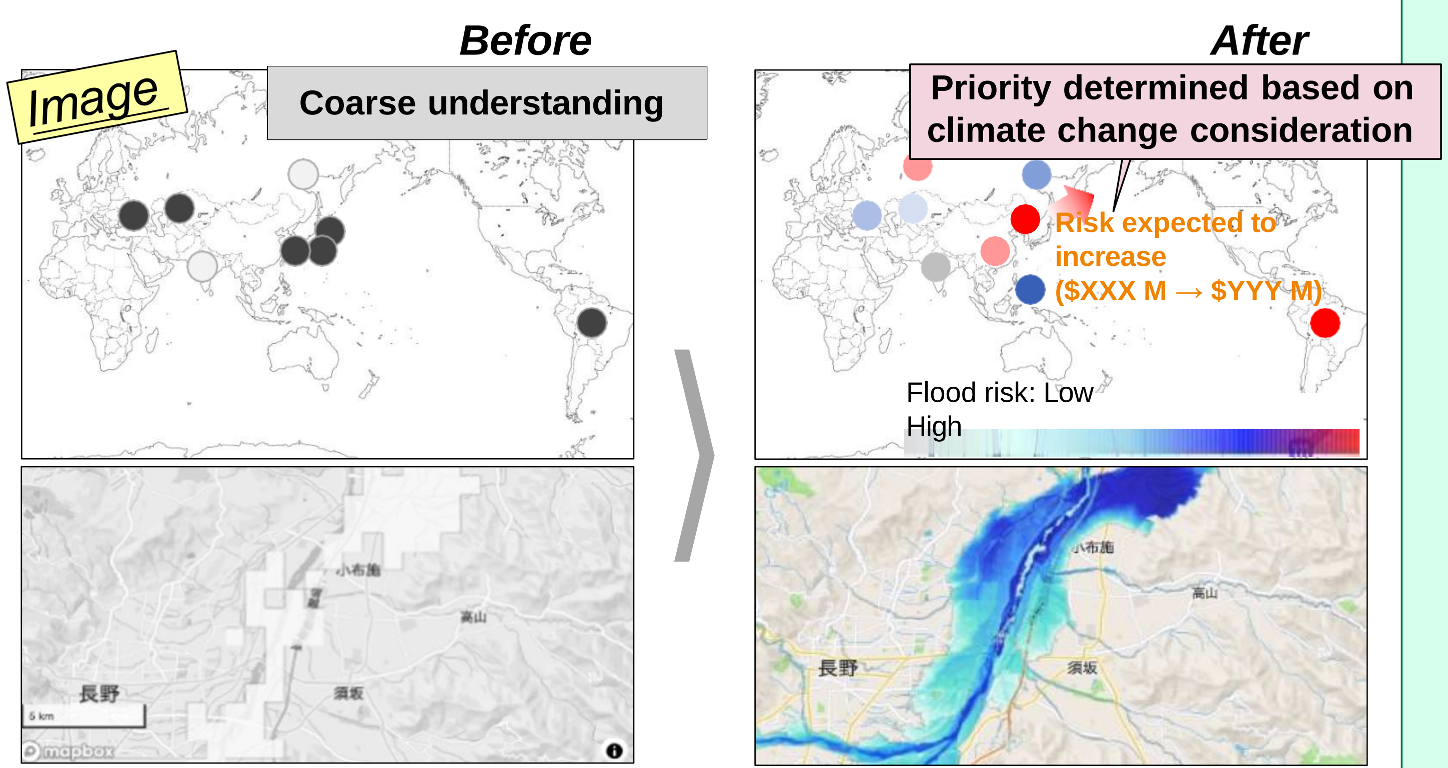


Used by **90+** companies (**manufacturing, logistics, utility and financial** sectors)

- ***Multiple climate change scenarios***
- ***Financial impacts on business***
- ***Globally consistent analysis***

Use case – Chemical manufacturer

✓ TCFD/CSRD disclosure requirements
✓ Risk control planning (BCP etc)

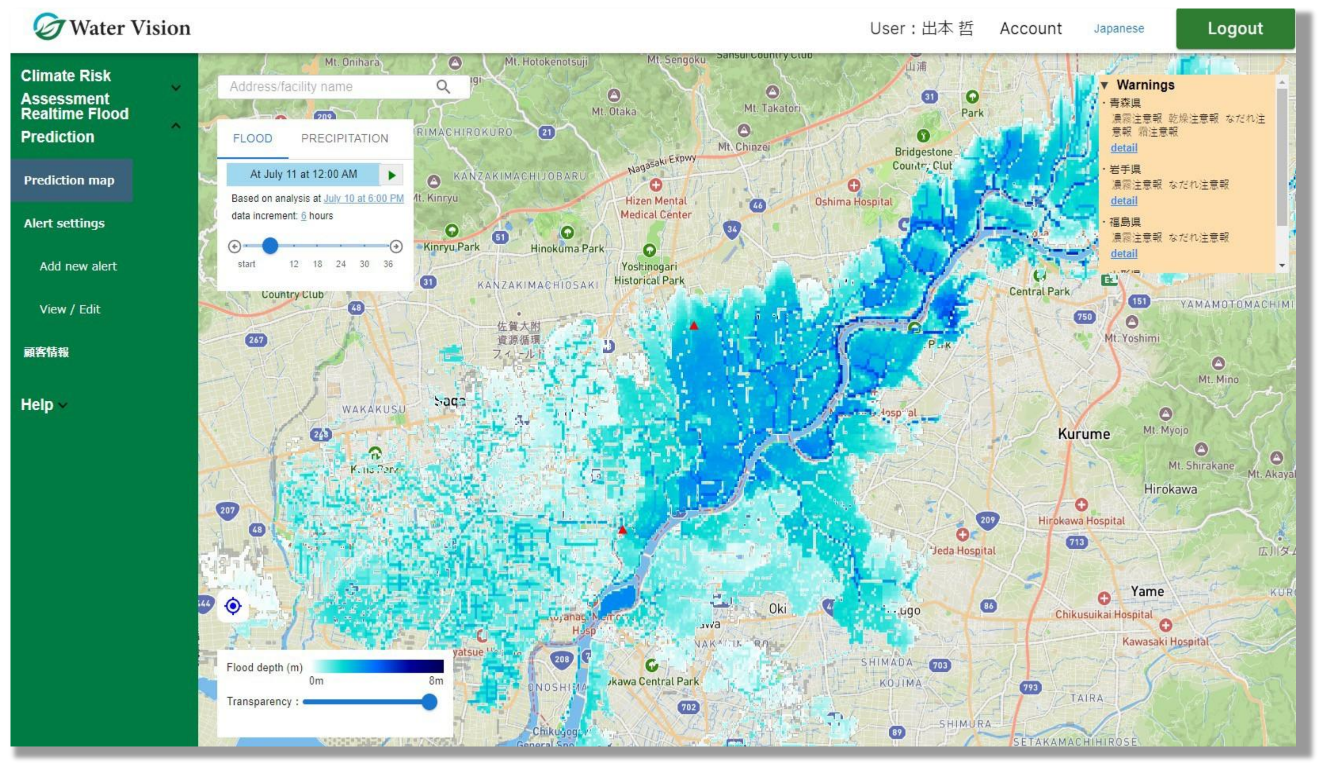


Unclear understanding of risk
→ Difficulty in prioritization
→ Slower risk management

Detailed, quantitative data
→ "Location XX needs earlier risk management"

High-resolution flood forecast

Water Vision

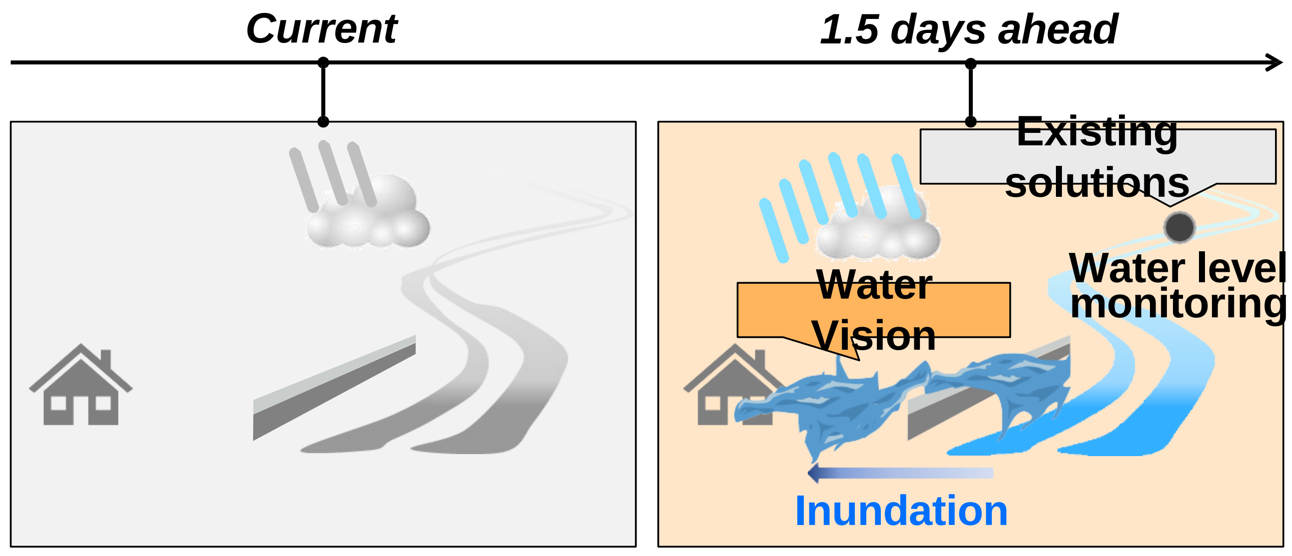


'Today's Earth', developed by JAXA and The University of Tokyo, is used as input data.
[Pilot Stage] **National/Local governments, insurance and construction sectors**

- ***Real-time, hourly flood simulation***
- ***Flood area & depth prediction***
- ***High-resolution output***

Use case – Disaster Response in Public/Private sector

✓ Evacuation order decisions based on not only water level but also floods area/depth prediction



Our core technology

Global River Hydrodynamics Model
CaMa-Flood by UTokyo

✓ Japan's award-winning climate tech startup from the **University of Tokyo**
✓ Service used by **100 customers** of which 19 use paid versions
✓ Solution listed in **Japan's national guideline** for TCFD risk assessment
